TECHNICAL SKILLS

Git   HTML   CSS   Sass   JavaScript   jQuery   Bootstrap   Ember.js   React   Handlebars.js   Ajax   Grunt   SQL   PostgreSQL   MongoDB   Mongoose   Ruby   Ruby on Rails   Express.js   Node.js

EDUCATION

Bachelor of Science
University of Massachusetts Lowell

09/2013 – 05/2018   *Lowell, Massachusetts*

Degree
- Major: Criminology and Justice Studies
- Minor: Business Administration
- Concentration: Information and Technology

EXPERIENCE

Web Development Immersive
General Assembly

01/2018 – 04/2018   *Boston, Massachusetts*

Completed 600+ hours of coding in a 12-week Web Development Immersive program. This led to attaining key skills to build interactive web applications.

Projects:
- Rank It Up: A web application that allows users to create players and rank them according to their number of wins. Technologies used include: JavaScript, Ruby on Rails, SQL, Bootstrap, and jQuery. ⌅
- Raindrop: An e-commerce web application that "sells" a variety of products. Users can browse products across a range of categories which include electronics, clothing, entertainment and more! This project was made by a team of 3 developers. Technologies used include: Express.js, Node.js, MongoDB, Mongoose, and Stripe. ⌅
- Auxilio: An on demand web application that connects customers to independent contractors who provide requested assistance. Technologies used include: PostgreSQL, Ajax, Ruby on Rails, Ember.js, JavaScript, and Bootstrap. ⌅
- ContactMe: A contacts management web application. Technologies used include: PostgreSQL, Ajax, Ruby on Rails, Ember.js, JavaScript, and Bootstrap.

Marketing and IT Support Associate
Merrimack Valley Housing Partnership

01/2016 – 01/2018   *Lowell, Massachusetts*

Tasks
- Marketing: Interviewed new home buyers to write short biographies which would be used in MVHP's monthly newsletter.
- Social Media: Helped MVHP maintain and improve its social media presence by promoting their Facebook page.
- IT Support: Helped the team install and configure computer software, diagnose hardware and software faults, and solve technical problems.
